DETAILED ACTION

This action is responsive to the remarks filed 9-28-2006, which has been entered.

Claims 6-8 are allowed.

Response to Arguments

1. Applicant's arguments, filed 9-28-2006, with respect to claims 6-8 have been fully considered and are persuasive. Therefore, in light of applicant's argument, the claims are deemed allowable.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: in light of applicant's arguments, the prior art fails to anticipate or render obvious the combination of belt drive system driven by an IC engine as set forth in claims 6 and 7, and most significantly requires two generator of different sizes such that the first larger generator includes a one way clutch that transmit rotational torque in one direction from the crankshaft pulley to rotate the first generator and the pulley of the second generator includes a solid pulley that transmit rotational torque in both direction between the crankshaft the rotor of the second generator; additionally, claim 7 further set forth the pulley of the first generator is coupled to the belt at a position closer to the pulley of the belt tensioner than the pulley of the second generator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
